# ABSTRACT

## **Meme? Meta?....All in one.....**

META FLOKI was created in February 2022 with the goal of being a decentralized meme project with true purpose. METAFLOKI's goal is to make cryptocurrency adoption mainstream. Unlike older, comparable projects, METAFLOKI will introduce holders to next-gen concepts such as NFTs, play to earn games, decentralized exchanges and real life charity drives.

# VALUES

## Trust

In the cryptocurrency market trust is paramount. That means full transparency not only in the community and development but also in security efforts. **MetaFloki** is an un-ruggable token with a locked Liquidity Pool.

## Transparency

**MetaFloki** is decentralized and supported by its community of enthusiasts. We encourage open communication and believe trust, transparency, and community are the 3 pillars to building longevity.

## Community

**MetaFloki** will be one of the fastest-growing communities in the crypto market and we believe that unity is power. Community is everything and we strive to include everyone from around the globe.

# \$METAFLOKI

## What is MetaFloki coin?

**\$METAFLOKI** is a BEP-20 token launched on the Binance smartchain network.

The max supply is 10 quadrillion and key functionality is its built-in redistribution mechanism. For every transaction (buy or sell), 3% is sent to existing **\$METAFLOKI** holders as a reward.

That means their wallets increase automatically over time. 5% is added to liquidity as well for every transaction (buy or sell) while 2% is sent to the charity wallet.

## Why BSC?

Many tokens rely on the Ethereum blockchain to be exchanged (ERC20 TOKENS). This has saturated the ethereum blockchain and has caused an exponential rise in gas fees. This is a particular problem for small investors who many times see the gas fees equalling or surpassing their initial investment. MetaFloki decided to take a different approach by using the binance blockchain (BEP20 TOKEN), the bnb network has incredibly low gas fees often just a few cents which is beneficial for investors of any size or scale.

# ECOSYSTEM

According to our roadmap, we will be rolling out next-gen products that will help build the MetaFloki EcoSystem.

## **MetaFloki NFTs**

10,000 unique dog collectibles with references from pop culture, anime, games, memes, movies, and more.

## **MetaFloki Swap**

We will be launching our very own fully decentralized exchange with cross-chain support for tokens such as ETH, SOL and FANTOM

## **MetaFloki Swag**

Collaborating with shopify and creating our very own merchs for our community with the support of social media influencers.

# TOKENOMICS

\$METAFLOKI employs 3 simple functions: Reflection + LP acquisition + marketing. In each trade, the transaction is charged a 10% fee, which is split in 3 ways.

**5%**

5% is sent to the locked liquidity pool.

**3%**

3% is redistributed to all existing holders.

**2%**

2% of each transaction is sent to the designated marketing wallet.
